### Free Dental Examinations for Children Age 12 and under

February is Children's Dental Health Month and your child(ren) can receive a free dental examination at a local dental health office or clinic. You will need to make an appointment for this examination which can include preventative and emergency services. Children will also get tips on daily oral hygiene and free tooth brushes, toothpaste, and floss.

If you are interested in this free dental examination, please contact the school nurse and she will provide you with more information.

Information is available at a New Jersey Website at [www.njda.org/gkas](http://www.njda.org/gkas) and at the American Dental Association (ADA) website [www.ada.org](http://www.ada.org). There is also a Give Kids A Smile (GKAS) hotline at 1-888-576-9278.
